## ISTRAŽIVANJE I RAZVOJ U 2014. GODINI RESEARCH AND DEVELOPMENT IN 2014

U saopćenju su prikazani podaci o zaposlenim i angažiranim na poslovima istraživanja i razvoja, bruto domaćim izdacima za istraživanje i razvoj, izvorima utrošenih sredstava za istraživanje i razvoj, vrijednosti i broju istraživačko-razvojnih radova; prema naučnoj oblasti istraživačko razvojnog rada.

Na poslovima istraživanja i razvoja u 2014. godini bilo je zaposleno 2158 osoba, sa punim i kraćim od punog radnog vremena, od čega je 1041 žena, odnosno 48,24%. Broj osoba moguće je prikazati pomoću ekvivalenta pune zaposlenosti tako da dobijamo da je u 2014. godini 1087,30 osoba bilo zaposleno puno radno vrijeme na poslovima istraživanja i razvoja.

U istom periodu na poslovima istraživanja i razvoja, na osnovu ugovora o djelu ili autorskog ugovora, bilo je angažirano 337 osoba, od čega je 109 žena. Izraženo ekvivalentom pune zaposlenosti, na poslovima istraživanja i razvoja puno radno vrijeme bilo je angažirano 81,80 osoba.

Od ukupnog broja zaposlenih, najveće učešće imaju istraživači (55,60%), stručni saradnici (22,66%), tehničko osoblje (8,30%), ostalo osoblje (8,10%), rukovodeće osoblje (5,34%).

Najveći broj istraživača zaposlen je u sektoru visokog obrazovanja (96,25%), državnom sektoru (3,50%), poslovnom sektoru (0,25%) .

Kada se posmatra naučna oblast istraživačkog rada najveći broj istraživača zaposlen je u oblasti društvenih nauka (78,21%).

*The release presents data on persons employed and engaged in research and development, gross domestic expenditures on research and development, sources of funds for research and development, and value and number of research and development works; by sector of research and development implementation and by field of science of*

*There were 2158 persons engaged in R&D in full-time and part - time employment, out of which 1041 or 48.24% were women. It is also possible to display the total number of employees by full-time equivalent, thus, in 2014 there were 1087,30 persons working full-time in research and development activities.*

*In the same period, 337 persons were hired under temporary service contracts and copyright agreements in research and development activities, out of which 109 were women. Expressed in full time equivalent, 81.80 persons were hired under temporary service contracts and copyright agreements in research and development activities.*

*Out of the total number of employees, the largest share is that of researchers (55,60%), research associates (22,66%), technicians (8,30%), other supporting staff (8,10%) and management (5,34%).*

*Most researchers were hired in the sector of higher education (96,25%), followed by government sector (3,50%) and business sector (0,25%) .*

*By field of science, the highest number of researches was engaged in the field of Social sciences (78.21%).*

Bruto izdaci za istraživanje i razvoj u 2014. godini iznosili su 46 698 903 KM, od toga su tekući izdaci iznosili 34 958 222 KM (74,86%), a investicioni izdaci 11.740.681 KM (25,14%).

Gross expenditure on R&D in 2014 was 46 698 903 KM, out of which current expenditures were 34 958 222 KM (74,86%), and investment expenditure 11 740 681 KM (25,14%).

Bruto izdaci najveći su bili u oblasti Inženjstvo i tehnologija (45,60%). Naučna oblast određena je prema najvećem broju zaposlenih na poslovima istraživanja i razvoja, dakle ona naučna oblast u kojoj radi najveći broj osoba.

Gross expenditures were the highest in the field of Engineering and Technology (45,60%) . The field of science is determined according to predominance. The predominant field is the one in which most personnel work in research and development.

Najviše utrošenih sredstava za naučnoistraživački rad je u oblasti obrazovanja (80,78%).

The highest share of funds for R&D was intended for Education (80,78%).

Ukupan broj istraživačko-razvojnih radova je 921, od čega je najveći broj radova iz oblasti društvenih nauka (40,82%) i inženjstva i tehnologija( 28,12%).

The total number of R&D works was 921, with the majority of work being part of Social sciences (40,82%) and Engineering and Technology (28,12%).

Od 38 posmatranih jedinica koje su u 2014. godini obavljale djelatnosti istraživanja i razvoja , 25 jedinica je iz sektora visokog obrazovanja, 5 jedinica iz poslovnog sektora, a 8 jedinica iz državnog sektora.

Out of the total number of R&D units, which was 38 in 2014, 25 were part of the higher education sector, 5 were part of the business sector and 8 units were part both of government sector and non-profit sector.

## METODOLOŠKA OBJAŠNJENJA

Podaci su rezultat statističke obrade godišnjih izvještaja prikupljenih od poslovnih subjekata koji su obavljali djelatnosti istraživanja i razvoja u Federaciji Bosne i Hercegovine u 2014. godini i to od poslovnog sektora na godišnjem izvještaju o istraživanju i razvoju za poslovni sektor (obrazac IR-1) , od visokoškolskih ustanova na godišnjem izvještaju o istraživanju i razvoju (obrazac IR-2) i od državnog sektora i neprofitnih organizacija (obrazac IR-3).

Metodologija za sprovođenje istraživanja je usklađena sa međunarodnim standardima koje je postavio OECD i objavio u priručniku Frascati Manual (The Measurement of Scientific and Technological Activities – Proposed Standard Practice for Surveys of Research and Experimental Development – Frascati Manual, 2002 i 2007; izdavač: OECD ).

## DEFINICIJE

**Naučna istraživanja** su teorijski ili eksperimentalni rad koji se preduzima radi sticanja novih naučnih saznanja i povećanja sveukupnog ljudskog znanja. Naučnim istraživanjima se smatraju osnovna i primijenjena istraživanja.

**Osnovna (fundamentalna, bazična) istraživanja** obuhvataju ona istraživanja koja povećavaju opšti fond naučnih činjenica i znanja i koja određuju nova područja ljudskog znanja i spoznaja, ali koja nemaju ili ne moraju imati direktnu praktičnu primjenu dobijenih rezultata. Osnovna istraživanja otkrivaju pojave, procese, uzročno-posljedične veze i zakonitosti u prirodi, društvu i ljudskom mišljenju, i to, prije svega, radi unapređenja ljudskog znanja i stvaranja bazičnog znanja, koja dalje služe kao osnova za primijenjena i razvojna istraživanja i ona nemaju direktne komercijalne ciljeve.

**Primijenjena (aplikativna) istraživanja** su teorijski ili eksperimentalni rad koji se preduzima radi sticanja novih znanja, a koji je usmjeren na rješavanje nekog praktičnog zadatka, odnosno ostvarenje nekog praktičnog cilja. Primijenjena istraživanja proširuju i produbljuju postojeća znanja radi rješavanja određenih problema. Ono se preduzima ili radi ispitivanja moguće primjene rezultata fundamentalnih istraživanja ili utvrđivanja novih metoda ili postupaka za postizanje unaprijed određenog cilja. Primijenjena istraživanja su, prema tome, usmjerena na otkrivanje novih naučnih znanja, primjenu tih znanja u svrhu realizacije određenih komercijalnih ciljeva.

## EXPLANATION AND NOTE

*Data issued here are the result of statistical processing of annual reports collected from business entities engaged in the research and development activity in Federation of B&H during 2014, as follows: from business sector through the Annual Report on Research and Development for Business Entities (form IR-1), from institutions of higher education through the Annual Report on Research and Development for Higher Education Institutions (form IR-2), and from government and non-profit sector (form IR-3).*

*Methodology used while conducting this survey is harmonised with the international standards which the OECD established and published in the Frascati Manual (The Measurement of Scientific and Technological Activities – Proposed Standard Practice for Surveys of Research and Experimental Development–Frascati Manual, 2002 and 2007; publisher: Organisation for Economic Cooperation and Development).*

## DEFINITION

**Scientific research activity** refers to theoretical or experimental work undertaken to acquire new scientific knowledge and to increase overall human knowledge. Scientific research refers to basic and applied research.

**Basic (fundamental) research** refers to research that increases the general fund of scientific facts and knowledge, also defining new areas of human knowledge and understanding, but which does not have or does not have to have direct practical application of the results obtained. Basic research reveals phenomena, processes, causal relationships and laws of nature, society and human thinking, and, above all, which aim to advance human knowledge and creation of the basic knowledge, which further serve as a basis for applied and development research. It has no direct commercial objectives.

**Applied (application) research** refers to experimental or theoretical work undertaken in order to acquire new knowledge, aimed at solving a practical task or achieving a practical goal. Applied research expands and deepens the existing knowledge in order to solve specific problems. It is carried out in order to investigate possible application of results of fundamental research or to establish new methods or procedures to be used to achieve a predefined goal. Therefore, applied research is focused towards the discovery of new scientific knowledge and application of the knowledge in order to achieve certain commercial objectives.

**Razvojna (stručna) istraživanja**, odnosno eksperimentalni razvoj je sistematski rad, utemeljen na znanjima stečenim osnovnim ili primijenjenim istraživanjima, odnosno praktičnom iskustvu, koje je, prije svega, usmjereno na uvođenje novih ili znatno poboljšanje postojećih postupaka, proizvoda i usluga. To su svi postupci koji se javljaju između izuma i proizvodnje: eksperimentisanja na crtežu i razvoj prototipova, eksperimenti, pilot-projekti, modeli, nova rješenja. Ova istraživanja imaju izrazito praktični cilj, njihovo osnovno obilježje je jasna namjena, te direktna i brzo postignuta korist u nekom uskom području. Razvojna istraživanja se još nazivaju i tehnološka usavršavanja.

**Naučnoistraživački rad** je sistematska stvaralačka aktivnost kojom se primjenom naučnih metoda stiču nove naučne spoznaje, odnosno stvaralački koristi postojeće znanje za nove primjene. To je stvaralački rad na osvajanju novih znanja, a cilj mu je podizanje opšteg civilizacijskog nivoa društva i korišćenje tih znanja u svim oblastima društveno-ekonomskog razvoja. Naučnoistraživačkim radom se bave naučnici i istraživači koji su izabrani u odgovarajuća naučna, naučno-nastavna i istraživačka zvanja.

**Poslovni sektor** obuhvata preduzeća (privredne subjekte) i organizacije čija je primarna djelatnost tržišna proizvodnja robe i usluga i njihova prodaja po ekonomskim cijenama, kao i istraživačko-razvojne jedinice u sastavu preduzeća.

**Visoko obrazovanje** obuhvata univerzitete sa jedinicama u sastavu, fakultetima, akademijama, naučno-istraživačkim institutima bez obzira na izvore finansiranja i pravni status. Ovom sektoru pripadaju i istraživački instituti i klinike koje su pod neposrednom kontrolom ili upravom visokoškolske ustanove.

**Državni sektor** obuhvata organizacije, službe i druga tijela osim visokog obrazovanja, koja društvu pružaju one besplatne usluge koje se po tržišnim uslovima ne bi mogle obezbjeđiti, a predstavljaju izraz ekonomske i socijalne politike društva ; prema definiciji ovaj sektor obuhvata aktivnosti administracije, odbrane i regulisanja javnog reda; zdravstvo, obrazovanje, kulturu i druge društvene usluge.

**Sektor neprofitnih organizacija** obuhvata netržišne privatne neprofitne organizacije koje domaćinstvima pružaju usluge bez naplate ili po niskoj cijeni. Ove organizacije mogu biti osnovane od strane od strane udruženja građana radi obezbjeđenja robe i usluga za članstvo udruženja ili radi opće svrhe.

**Development (professional) research**, that is, experimental development, represents systematic work, based on the knowledge acquired through basic or applied research or practical experience, which is primarily focused on the introduction of new or significantly improved existing processes, products and services. These are all actions that occur between invention and production: experiments on drafts and development of prototypes, experiments, pilot projects, models, new solutions. This research has a very practical objective, their main feature is a clear purpose and direct benefit achieved quickly and in a very narrow field. Developmental research is also called technological advancement.

**Scientific research** is a systematic creative activity whose goal is to gain new scientific insights through the application of scientific methods, that is, creative use of the existing knowledge for new applications. This is creative work on the acquirement of new knowledge, and the goal is to raise the general level of civilisation of society and to use this knowledge in all areas of socio-economic development. Scientific research is carried out by scientists and researchers who were elected in the appropriate scientific, scientific-teaching and research positions.

**Business sector** covers enterprises (business entities) and organisations whose primary activity is market production of goods and services and their sale at economically significant prices, as well as research and development units in the composition of enterprises.

**Higher education** covers universities with units in composition, faculties, academies and scientific research institutes, regardless of their funding sources and legal status. This sector also covers research institutes and clinics that are under the direct control or administration of higher education institutions.

**Government sector** covers organisations, services and other bodies, except higher education, that provide the society with free common services, which could not be provided under market conditions and which represent an expression of the socio-economic policy of the society; by definition, this sector covers activities of administration, defense and public order; health care, education, culture, recreation and other social services.

**Sector of non-profit organisations** covers non-market private non-profit organisations which provide households with services free of charge or at low prices; these organisations may be established by citizens' associations in order to provide association members with goods and services or for the general purpose.

**Istraživači** su stručnjaci angažovani na stvaranju novih znanja, metoda i sistema, te provođenju istraživačkih projekata.

**Stručni saradnici** su zaposleni sa visokim obrazovanjem, koji direktno učestvuju sa istraživačima pri izvršavanju istraživačko - razvojnih zadataka, ali nisu nosioci istraživačko – razvojnih projekata.

**Tehničko osoblje** su zaposleni koji obavljaju tehnički dio istraživačko - razvojnog zadatka, pod nadzorom istraživača. Stepen obrazovanja je u pravilu srednji, ali može biti i viša i visoka škola, u zavisnosti od standardizacije tehničkih zadataka.

**Rukovodeće osoblje** su zaposleni koji se veći dio radnog vremena bave upravljačko – organizacijskim poslovima; u suprotnom ih razvrstajte među istraživače ili stručno osoblje.

**Drugo osoblje** (pomoćno) su zaposleni koji obavljaju sekretarske i druge administrativne poslove (administrativno osoblje koje se uglavnom bavi finansijskim i kadrovskim poslovima i uopšte administracijom), ako je njihov rad direktno povezan sa istraživačko - razvojnim projektima. Tu se uključuju pod istim uslovima i rukovodioci mašina i uređaja i industrijski proizvođači i sastavljači.

**Ekvivalent pune zaposlenosti** se izračunava za osobe koje rade kraće od punog radnog vremena na poslovima istraživanja i razvoja. Zaposleni sa punim radnim vremenom odgovaraju jedinici ekvivalenta pune zaposlenosti.

Ukupni izdaci za istraživanje i razvoj koji obuhvataju sva finansijska sredstva potrošena za istraživanje i razvoj čine:

1) tekući izdaci (troškovi) koji obuhvataju:

a) troškove rada i troškove naknada zaposlenima (bruto plate i naknade bruto plata za sve zaposlene u IR djelatnosti; druge naknade zaposlenima u IR, npr. stipendije, nagrade i ostalo.

b) ostale tekuće troškove (materijalne troškove na istraživačko - razvojni rad, sirovine, materijal, energija; isplate na osnovu ugovora o djelu i autorskih ugovora; dnevnice, putne troškove, reprezentaciju i druge izdatke.

2) **investicijski izdaci** koji obuhvataju izdatke za zemljište i građevinske objekte; mašine i opremu; patente, licence, studije i projekte; softver i hardver (koji podrazunjeva ukupne troškove vezane za nabavku računara, uređaja, sistema, komponenti i opreme, kao i troškove nabavke ili razvijanja softvera za vlastite potrebe) i ostale izdatke.

ZNAKOVI

- nema pojave

**Researchers** are professionals engaged in the creation of new knowledge, methods and systems, and also in the management of the projects concerned.

**Research associates** are employees with completed higher education, who directly participate alongside researchers in the performance of research and development activities.

**Technicians** are employees who perform the technical part of the research and development task, under the supervision of researchers. Education level is generally secondary, but may be higher, depending on the standardisation of technical tasks.

**Management** refers to employees dealing mainly with managerial and organisational tasks. Otherwise, they should be classified in the category of "researchers" or "research associates".

**Other supporting staff** are employees performing secretarial and other administrative tasks, insofar as their activities are a direct service to research and development projects. This category includes also, under the same provisions, plant and machine operators, and industrial manufacturers and assemblers.

Full-time equivalent was calculated for persons who were engaged shorter than full – time employment on research and development jobs. Full-time equivalent for persons engaged in full-time employment on R&D is equal to the unit of full time equivalent.

Total expenditure for research and development, which includes all funds expended for research and development, are:

1) current expenditures (costs) that include:

a) labor costs and costs of compensation of employees (gross salaries and allowances of gross salaries for all those employed on R&D activities, other compensation of those employed in R&D, such as fellowships, awards, and other costs).

b) other current costs (material costs of research and development activities – raw material, energy, payments based on temporary service contracts and copyright agreements, daily wages, travelling allowances, representation and similar, and other costs).

2) **Capital expenditures** which cover expenditures on land and buildings, machinery and equipment, patents, licences, studies and projects, software and hardware (which means total expenditure on purchase of computers, devices, systems, components and equipment, as well as expenditure on acquisition or development of software for own needs), and other expenditures.
