SARAJEVO, 22. 05. 2017.

BROJ/NUMBER: 1.3 CORR.

PROIZVODNJA I PRODAJA DRVNIH SORTIMENATA U FEDERACIJI BiH MART/OŽUJAK 2017. - ISPRAVAK

PRODUCTION AND SALE OF FORESTRY ASSORTMENTS IN THE FEDERATION OF BiH
MARCH 2017 - CORRECTION

Ukupna proizvodnja šumskih sortimenata u periodu I – III 2017. godine u odnosu na isti period 2016. godine manja je za 10.000 m³ ili 2,7 %.

Proizvodnja sortimenata od četinara/četinjača je manja za 12.000 m³ (6,5%) dok je proizvodnja sortimenata od lišćara/listača veća za 1.000 m³ (0,4%).

ISPRAVAK

Molimo korisnike da se koriste ovim saopćenjem umjesto saopćenja broj 1.3/17 "Proizvodnja i prodaja šumskih sortimenata u FBiH mart/ožujak 2017" od 25.04.2017.

The total production of forestry assortments in period I - III 2017 fell by 10.000 m³ (2.7%) in relation to 2016.

Production of assortments of conifers fell by 12.000 m³ (6.5%), while the production of assortments of broadleaves rose for 1.000 m³ (0.4%).

CORRECTION

Please users to use this first release instead of release number 1.3/17 "Production and sale of forestry assortments in FBiH in March 2017" published on 25.04.2017.

METODOLOŠKA OBJAŠNJENJA

Izvor i metode prikupljanja podataka

Podaci o proizvodnji, prodaji i zalihamu drvnih sortimenata u državnim šumama rezultat su Mjesečnog istraživanja šumarstva ŠUM- 22 koje provodi Federalni zavod za statistiku.

Mjesečnim izvještajem šumarstva obuhvaćene su sve pravne osobe razvrstane u Registru poslovnih subjekata u području A-Poljoprivreda, lov i šumarstvo, oblast 02-Šumrštvo, sječa drveta i usluge povezane sa njima, a koje se bave stalnom proizvodnjom šumskih sortimenata u državnim šumama.

Prikupljanje podataka o proizvodnji i prodaji u šumarstvu vrši se na osnovi Nomenklature proizvoda i usluga šumarstva – NPUŠ, koja je izrađena za potrebe statistike šumarstva na osnovi Liste karakterističnih proizvoda šumarstva, koju je Eurostat (Statistički ured Evropske unije) objavio kao integralni dio Priručnika za ekonomske račune poljoprivrede i šumarstva (Manual on the Economic Accounts of Agriculture and Forestry – EAF) u novembru/studenom 1997. godine.

Definicije

Trupci (lišćara/listača i četinara/četinjača) su dijelovi debla koji su namjenjeni daljem prerađivanju piljenjem, ponekad rezanjem ili ljuštenjem jer imaju povoljna fizička i kemijska svojstva, te su namjenjeni za industrijsku preradu.

Jamsko drvo (lišćara/listača i četinara/četinjača) namjenjeno je za razne tehničke svrhe jer ima vrlo povoljna fizička i kemijska svojstva. To je drvo koje se upotrebljava za izgradnju i održavanje jamskih rovova i okna, dakle za gradnju u zemlji i pod zemljom.

Ostalo dugo drvo (lišćara/listača i četinara/četinjača) obuhvaća sve vrste drveta pogodne za mehaničku preradu, stupove za elektro vodove i TT vodove te ostalo oblo drvo.

Prostorno drvo (lišćara/listača i četinara/četinjača) obuhvaća drvo za drvene ploče (pogodno za mehaničku preradu), a celulozno i taninsko drvo, zbog svog povoljnog kemijskog svojstva, pogodno je za kemijsku preradu. Taninsko drvo je sirovina iz koje se preradom dobivaju taninski ekstrati.

Ogrjevno drvo (lišćara/listača i četinara/četinjača) je namjenjeno neposredno za ogrjev ili za proizvodnju drvenog uglja.

Ostalo grubo obrađeno drvo (lišćara/listača i četinara/četinjača) obuhvaća sitno tehničko drvo, pogodno za izradu drvenih motki i kolja, raznih letvi i stupova za ogradu, ručica za alat i sl.

NOTES OF METHODOLOGY

Source and methods of data collection

Data on production, sale and stocks of forestry assortments in the publicly-owned forests are result of monthly reports on surveys of forests (ŠUM – 22) conducted by the Institute for Statistics of FBiH.

All legal entities clasified in the Register of Business Entities under Section A – Agriculture, hunting and forestry Division 02 – Forestry, felling and related services activities, engaged in permanent production forest assortments in the publicly-owned forests, are exteded by Monthly Report of forestry.

Data collection on production and sales of forestry is practised on the basis of the Nomenclature of Forest Products and Services NPUŠ which is made for the purposes of forestry statistics on the basis the List of Characteristic Products of the Comercial Timber Production compiled by the Eurostat (the Statistical Office of the European Union), and published as an integral part of the Manual for Economic Accounts of Agriculture and Forestry in November 1997.

Definitions

Logs (broad-leaved trees and conifers) are parts of timber intended for further procesing by sawing, sometimes by cutting or peeling, because of its good physical and chemical characteristics, so it is useful to be industrially processed.

Mining timber (broad-leaved trees and conifers) having very good physical and chemical characteristics, is intended for various technical purposes. It is used for bulding and maintaing pits and shafts, therefore, for constructing under ground and on the surface.

Other long timber (broad-leaved trees and conifers) includes all kinds of wood suitable for mechanical processing, transmission-line and telephone-line pylons as well as other oval timber.

Stack wood (broad-leaved trees and conifers) includes wood for boards (suitable for mechanical processing), and wood-pulp and tannin wood are, because of its good chemical characteristics, suitable for chemical processing. Tanin wood is a material that, processed, gives tannin extracts.

Fuel wood (broad-leaved trees and conifers) is intended directly for fuel or production of wood coal.

Other roughly processed wood (broad-leaved trees and conifers) includes paltry technical wood suitable for prosessing of wood poles, diferent bars and fence piers, tool cager etc.
