

**UPOTREBA INFORMACIONO-KOMUNIKACIJSKIH TEHNOLOGIJA
U DOMAĆINSTVIMA I POJEDINAČNO, 2023.**

*USAGE OF INFORMATION AND COMMUNICATION TECHNOLOGIES
IN HOUSEHOLDS AND BY INDIVIDUALS, 2023*

Rezultati istraživanja o upotrebi informaciono-komunikacijskih tehnologija u domaćinstvima i pojedinačno (IKT-D), u Federaciji Bosne i Hercegovine, za 2023. godinu, pokazali su sljedeće:

- 70,8% domaćinstava posjeduje računar
- 79,8% domaćinstava posjeduje internet priključak.

The results of anual survey on the Usage of information and communication technologies in households and by individuals, in Federation of Bosnia and Herzegovina for 2023. showed:

- 70.8% of households, owns an personal computers .*
- 79.8% of the households owns an Internet connection.*

1. Opremljenost domaćinstava IKT-om.

1. Households equipped with ICT.

Na osnovu dobijenih rezultata provedenog istraživanja 70,8% domaćinstava ima pristup računaru, a 79,8% domaćinstava posjeduje internet priključak.

Based on the results obtained 70.8% of households have personal computer and 79,8% of households have an Internet connection.

2. Pristup uređaju u domaćinstvima, prema tipu naselja.

2. Access to device in households, by type of settlements.

U gradskom tipu naselja, računar je zastupljen u 71,6% domaćinstava, dok je zastupljenost računara u ostalom tipu naselja 70,1%.

In the urban type of settlement, the computer is represented in 71.6% of households, while the representation of the computer in the rural type of settlement was 70.1%.

3. Pristup internetu u domaćinstvima, prema tipu naselja. ¹⁾

3. Access to Internet in households, by type of settlements.

U gradskom tipu naselja, internet je zastupljen u 81,3% domaćinstava, dok je zastupljenost interneta u ostalom tipu naselja 78,6%.

In the urban type of settlement, the Internet is represented in 81.3% of households, while the representation of the Internet access in the rural type of settlement was 78.6%.

1) Uključen je pristup internetu putem računara, laptopa, netbook-a, tableta i pametnih telefona.

1) Involving internet access by desktop PC, laptop, netbook, tablet and smart phone.

4. Učestalost korištenja računara.

4. Frequency of computer use.

U Federaciji Bosne i Hercegovine 72,5% pojedinaca u domaćinstvu je koristilo računar u referentnom kvartalu, 3,5% pojedinaca je koristilo računar prije više od 3 mjeseca, 5,1% pojedinaca je koristilo računar prije više od jedne godine. Računar nikada nije koristilo 18,9% pojedinaca.

In Federation of Bosnia and Herzegovina 72.5% of individuals in the households used a personal computer in the reference quarter, 3.5% of individuals used the computer more than three months ago, 5.1% of individuals used the computer more than a year ago. The computer has never been used by 18.9% of individuals.

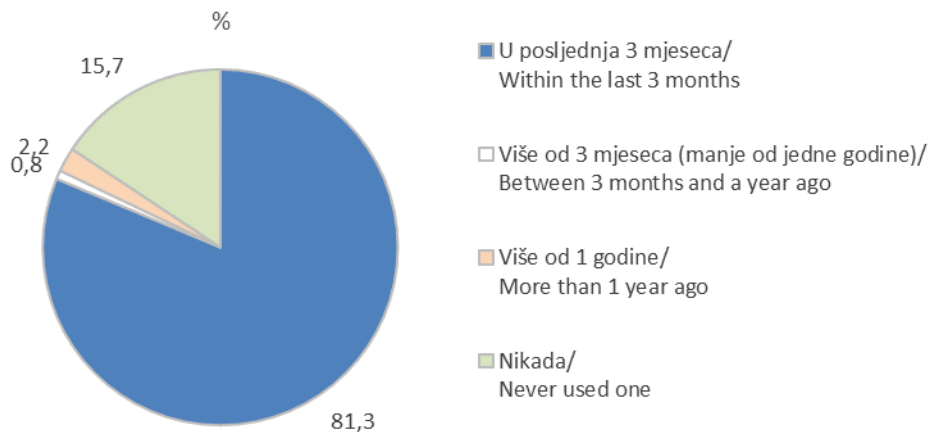

5. Učestalost korištenja interneta.

5. Frequency of Internet use.

U Federaciji Bosne i Hercegovine 81,3% pojedinaca u domaćinstvu je koristilo internet u referentnom kvartalu, 0,8% pojedinaca je koristilo internet prije više od 3 mjeseca, 2,2% pojedinaca je koristilo internet prije više od jedne godine. Internet nikada nije koristilo 15,7% pojedinaca.

In Federation of Bosnia and Herzegovina 81.3% of individuals in the households used the Internet in the reference quarter, 0.8% of individuals used the Internet more than three months ago, 2.2% of individuals used the Internet more than a year ago. The internet has never been used by 15.7% of individuals.

METODOLOŠKA OBJAŠNJENJA

Svrha statističkog istraživanja

Cilj istraživanja je da se dobiju podaci o zastupljenosti i upotrebi informaciono-komunikacijskih tehnologija u domaćinstvima i pojedinačno za Federaciju Bosne i Hercegovine.

Koncepti i definicije koji se primjenjuju u ovom istraživanju su usklađeni sa Eurostat-ovom metodologijom za statistike o informatičkom društvu, 2023., a posebno regulativom Evropskog parlamenta i Vijeća br. 2019/1700 o statistici Zajednice o informatičkom društvu.

Svrha ovog istraživanja je prikazati nivo upotrebe računara i ostalih informaciono-komunikacijskih tehnologija, te broj osoba u Federaciji Bosne i Hercegovine koji su korisnici interneta i za koje se svrhe upotrebljava internet. Ovi podaci čine važan izvor informacija za provođenje politika u sektoru informatičkog društva.

Jedinice posmatranja

Jedinica posmatranja je domaćinstvo izabrano u uzorak, a jedinica anketiranja je slučajno odabrani član domaćinstva koji ima između 16 i 74 godine starosti. Podaci su prikupljeni u drugom kvartalu 2023. telefonskim anketiranjem pojedinaca iz odabranih domaćinstava.

Veličina uzorka

Veličina uzorka je 4.056 domaćinstava.

Uzorak za anketu o upotrebi informacijsko-komunikacijskih tehnologija u domaćinstvima uključuje domaćinstva koja imaju barem jednu osobu starosti 16-74 godine.

Definicije

ADSL (Asymmetric Digital Subscriber Line) Asimetrična digitalna pretplatnička linija: Širokopolasna digitalna transmisiona tehnologija koja koristi postojeću telefonsku liniju i dopušta istovremeno slanje podataka i komunikaciju glasom.

Digitalna pretplatnička linija DSL (Digital Subscriber Line): Vrsta brze širokopolasne internet konekcije pomoću standardnih telefonskih parica.

Pod **korištenjem društvenih mreža** podrazumijeva se upotreba internet aplikacija ili komunikacijskih platformi, u okviru ili izvan preduzeća za povezivanje, kreiranje i razmjenu sadržaja na mreži s kupcima ili dobavljačima. Preduzeća koja koriste društvene mreže su ona preduzeća koja imaju korisnički profil ili korisničku licencu zavisno od vrste društvene mreže.

NOTES OF METHODOLOGY

Purpose of the statistical survey

The aim of the survey is to obtain data on the presence and use of information and communication technologies for Federation of Bosnia and Herzegovina.

The concepts and definitions used in this survey are harmonized with the Eurostat Methodology for Statistics on the Information Society, 2023 and especially with the European Parliament and the Council Regulation no. 2019/1700 concerning Community statistics on the information society.

The purpose of this survey is to show the level of use of computers and other information and communication technologies, as well as the number of persons in Federation of Bosnia and Herzegovina who are Internet users and for which the Internet is used. These data constitute an important source of information for implementing the policy in the sector of the Information society

Observations units

Observation unit are sampled based households, while survey units are randomly selected household members aged between 16 and 74. The data were collected by phone call of interviewers in selected households, in the second quarter of 2023.

Sample size

Sample size is 4.056 households.

The sample for IKT-D for 2021. is selected by involving only those households for IKT-D who have at least one member aged between 16 and 74.

Definitions

ADSL (Asymmetric Digital Subscriber Line): Broadband digital transmission technology which uses the existing telephone line, allowing simultaneous transmission of data and voice calls.

Digital Subscriber Line (DSL): A type of broadband Internet connection established using standard telephone lines.

Under the **use of social networks** is the use of Internet applications and communications platforms, within or outside the enterprise to connect, create and share content online with customers or suppliers. Enterprises that use social networks are those enterprise that have a user profile or a user license, depending on the type of social network.

Broadband su širokopolasne tehnologije ili veze koje omogućavaju brz prijenos podataka, naročito filmova, igara, videokonferencija putem internetske mreže (npr. ADSL, kablovska veza, UMTS, optička veza, VDSL).

IKT (informacijske i komunikacijske tehnologije) su softveri i hardveri upotrijebljeni za komuniciranje podacima (npr. računar, telefaks, internet, fiksni i mobilni telefon).

E-trgovina su transakcije koje se provode preko mreža računara baziranih na internetskom protokolu te preko ostalih računarskih mreža. Primanje narudžbi, dobara i usluga ostvaruje se putem navedenih mreža, ali samo plaćanje i konačna isporuka dobara i usluga mogu biti provedeni online ili offline. Narudžbe primljene telefonom, telefaksom ili ručnospisanim elektronskim porukama ne smatraju se e-trgovinom.

Mobilni priključak na internet podrazumijeva korištenje prijenosnih uređaja povezanih na internet u svrhu poslovnih potreba koristeći mreže mobilnih telefona. Predmet promatranja su preduzeća koja omogućavaju zaposlenima da koriste prijenosne uređaje s pristupom na internet za poslovne potrebe.

- **3G** je ime za treću generaciju mobilne telefonije. Omogućava prijenos ne samo teksta i zvuka nego i pokretnih slika, televizije i ostalih avangardnih usluga.

- **4G** je ime za četvrtu generaciju mobilne telefonije. Omogućava veoma brz prijenos podataka i multimedijalno sadržaja preko mobilnih uređaja kao i gotovo trenutno odzivi mreže i učitavanje online sadržaja.

Internet se odnosi na mrežu baziranu na ovim internetskim protokolima: www, ekstranet putem interneta, EDI putem interneta, internet-ready mobilni telefoni.

Računari uključuju personalne računare (PC), prijenosne računare (laptop), tablete i ostale prijenosne uređaje (npr. smartphones).

Web stranica je mjesto na World Wide Webu identificirano internetskom adresom. Skup internetskih datoteka o određenom subjektu uključuje početnu datoteku koja se naziva početna stranica. Informacije su kodirane posebnim jezicima (HyperText Mark-up Language (HTML), XML, Java) koji su čitljivi preko internetskih pretraživača kao što su Mozilla Firefox, Opera ili Microsoft's Internet Explorer.

Broadband are technologies or connections that enable rapid transmission of data, especially films, games, video-conferences over an internet network (e.g. ADSL, cable connection, UMTS, optical connection, VDSL, leased lines).

ICT (Information and Communication Technology) are software and hardware used for data communication (e.g. computer, fax, the internet, fixed mobile phone).

E-commerce means transactions conducted over an internet protocol-based networks and over other computer-mediated networks. Goods and services are ordered via those networks, but the payment and the ultimate delivery of the goods or services may be conducted on-line or off-line. Orders received via telephone, facsimile, or manually typed e-mails are not counted as electronic commerce.

Mobile connection to the Internet involves the use of removable devices connected to the Internet for the purpose of business needs using mobile phone networks. Observation by companies that allow employees to use mobile devices to access the Internet for business purposes.

- **3G** is the common name for the third generation mobile telephony. It allows the transfer of not only text and sound but also moving pictures, television, and other avant-garde services.

- **4G** is the common name for the fourth generation of mobile telephony. Offers high speed data transfer and multimedia content over mobile devices and almost immediate response network and upload online content.

The internet refers to the following networks of internet protocols: www, extranet via the internet, EDI via the internet, internet-ready mobile phones.

Computers include personal computers (PCs), portable computers (laptops), tablets and other portable devices (eg, smartphones).

Website is a location on the World Wide Web identified by a web address. Collection of Web files on a particular subject includes a beginning file called the home page. Information is encoded with specific languages (HyperText Mark-up Language(HTML), XML, Java) readable over a web browser such as Mozilla Firefox, Opera, or Microsoft's Internet Explorer.
