PROIZVODNJA I PRODAJA DRVNIH SORTIMENATA U FBiH, AVGUST/KOLOVOZ 2015.

PRODUCTION AND SALE OF FORESTRY ASSORTMENTS IN THE FB&H AUGUST 2015

Ukupna proizvodnja šumskih sortimenata u periodu I–VIII 2015. godine u odnosu na isti period 2014. godine manja je za 54000 m³ ili 4,1 %.

Proizvodnja sortimenata od četinarara/četinjača je manja za 28000 m³ (4,1 %) dok je proizvodnja sortimenata od lišćara/listača manja za 26000 m³ (4,2%).

Ukupna prodaja šumskih sortimenata u periodu I - VIII 2015. godine u odnosu na isti period 2014. je manja za 36000 m³ ili 3,1%

Prodaja sortimenata od četinarara/četinjača manja je za 6000 m³ (1,1%) dok je prodaja sortimenata od lišćara/listača manja za 29000 m³ (4,8 %).

The total production of forestry assortments in period I - VIII 2015 fell by 54.000 m³ (4.1%) in relation to 2014.

Production of assortments of conifers fell by 28.000 m³ (4.1%), while the production of assortments of broadleaves fell by 26.000 m³ (4.2%).

The total sale of forestry assortments in period I - VIII 2015 fell by 36.000 m³ (3.1%) in relation to 2014.

Sale of assortments of conifers fell by 6.000 m³ (1.1%), while sale of assortments of broadleaves fell by 29.000 m³ (4.8%).

METODOLOŠKA OBJAŠNJENJA

Izvor i metode prikupljanja podataka

Podaci o proizvodnji, prodaji i zalihama drvnih sortimenata u državnim šumama rezultat su Mjesečnog istraživanja šumarstva ŠUM- 22 koje provodi Federalni zavod za statistiku.

Mjesečnim Izvještajem šumarstva obuhvaćene su sve pravne osobe razvrstane u Registru poslovnih subjekata u području A- Poljoprivreda, lov i šumarstvo, odjeljak 02-Šumarstvo, sječa drveta i usluge povezane sa njima, a koje se bave stalnom proizvodnjom šumskih sortimenata u državnim šumama.

Prikupljanje podataka o proizvodnji i prodaji u šumarstvu vrši se na osnovi Nomenklature proizvoda i usluga šumarstva – NPUŠ, koja je izrađena za potrebe statistike šumarstva na osnovi Liste karakterističnih proizvoda šumarstva, koju je Eurostat (Statistički ured Evropske unije) objavio kao integralni dio Priručnika za ekonomske račune poljoprivrede i šumarstva (Manual on the Economic Accounts of Agriculture and Forestry – EAF) u novembru/studenom 1997. godine.

Definicije

Trupci (lišćara/listača i četinarara/četinjača) su dijelovi debla koji su namjenjeni daljem prerađivanju piljenjem, ponekad rezanjem ili ljuštenjem jer imaju povoljna fizička i kemijska svojstva te su namjenjeni za industrijsku preradu.

Jamsko drvo (lišćara/listača i četinarara/četinjača) namjenjeno je za razne tehničke svrhe jer ima vrlo povoljna fizička i kemijska svojstva. To je drvo koje se upotrebljava za izgradnju i održavanje jamskih rovova i okna, dakle za gradnju u zemlji i pod zemljom.

Ostalo dugo drvo (lišćara/listača i četinarara/četinjača) obuhvaća sve vrste drveta pogodne za mehaničku preradu, stupove za elektro vodove i TT vodove te ostalo oblo drvo.

Prostorno drvo (lišćara/listača i četinarara/četinjača) obuhvaća drvo za drvene ploče (pogodno za mehaničku preradu), a celulozno i taninsko drvo, zbog svog povoljnog kemijskog svojstva, pogodno je za kemijsku preradu. Taninsko drvo je sirovina iz koje se preradom dobivaju taninski ekstrati.

Ogrjevno drvo (lišćara/listača i četinarara/četinjača) je namjenjeno neposredno za ogrjev ili za proizvodnju drvenog uglja.

Ostalo grubo obrađeno drvo (lišćara/listača i četinarara/četinjača) obuhvaća sitno tehničko drvo, pogodno za izradu drvenih motki i kolja, raznih letvi i stupova za ogradu, ručica za alat i sl.

NOTES OF METHODOLOGY

Source and methods of data collection

Data on production, sale and stocks of forestry assortments in the public-owned forests are result of monthly reports on surveys of forests (ŠUM – 22) conducted by the Federal Office of Statistics.

All legal entities classified in the Register of Business Entities under section A – Agriculture, hunting and forestry Section 02 – Forestry, felling and related services activities, engaged in permanent production forest assortments in the publicly-owned forests, are extended by Monthly Report of forestry.

Data collection on production and sales of forestry is practised on the basis of the Nomenclature of Forest Products and Services NPUŠ which is made for the purposes of forestry statistics on the basis the List of Characteristic Products of the Commercial Timber Production compiled by the Eurostat (the Statistical Office of the European Union), and published as an integral part of the Manual for Economic Accounts of Agriculture and Forestry in November 1997.

Definitions

Logs (broad-leaved trees and conifers) are parts of timber intended for further processing by sawing, sometimes by cutting or peeling, because of its good physical and chemical characteristics, so it is useful to be industrially processed.

Mining timber (broad-leaved trees and conifers) having very good physical and chemical characteristics, is intended for various technical purposes. It is used for building and maintaining pits and shafts, therefore, for constructing under ground and on the surface.

Other long timber (broad-leaved trees and conifers) includes all kinds of wood suitable for mechanical processing, transmission-line and telephone-line pylons as well as other oval timber.

Stack wood (broad-leaved trees and conifers) includes wood for boards (suitable for mechanical processing), and wood-pulp and tannin wood are, because of its good chemical characteristics, suitable for chemical processing. Tannin wood is a material that, processed, gives tannin extracts.

Fuel wood (broad-leaved trees and conifers) is intended directly for fuel or production of wood coal.

Other roughly processed wood (broad-leaved trees and conifers) includes paltry technical wood suitable for processing of wood poles, different bars and fence piers, tool cager etc.
